

To,

DR. Aftab Qureshi

Dear Sir;

It is respectfully stated that I am a bonafide student of 1st year MBBS class in this university. I belong to a family which is economically so weak that it can not support my expenses on medical education. My father is an old person and works as a labourer in a private factory on a very humble monthly income that is 3000/-. In this age, he finds very hard to support a family of 5 members. I have 3-brothers and 1-sister (13-years). My brothers study in a high school of the village.

I was the 1st man to come in medical university so in my family. It was a pleasure for my parents. And by and large, my fees were managed in any way at the best of their efforts. But as a matter of fact they could not continue it for a long.

I am a hostelite in KEMU boys hostel hall road. Regarding my expenses, some details are given below:

- ① - HOSTEL MESS : 2000/- per month
- ② - ROOM RENT : 400/- per month
- ③ - COLLEGE FEES : 11000/- per annum
- ④ - ELECTRICITY & other miscellaneous expenses of Hostel, Books : 1000/- per month.

It comes to be 3500-4000/- per month. It is ^{more than} enough for a guardian having monthly income of 3000/-. So there is almost

(P-T-0)

[of hostel ~~mes~~ residence has not been issued
and I have attached an old copy present
in my documents]

very reduced help from my parents. That is
increasing the trouble more.

I have somehow managed my
self of these expenses. I am teaching tuition
in evening in an academy for 4 hours. That
pays me 2000/- per month but strains a lot
on my educational carrier in medical studies.

Rising mess charges (increased
market prices) and also of Hostel dues, are
adding more and more trouble for me and
are making medical education more and
more difficult to attain for me. I am in
a dilemma, and do not know what to do?
I have dragged so far with these troubles
but now it seems much difficult to continue.
Please, help me financially, so that can
remove my troubles and I can also become
a good doctor by achieving medical education.

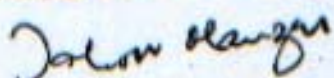

Your Sincere
